## History

faytech has its roots in Germany. Arne Weber, the founding manager of faytech, started to develop and market electronic devices in 2001. Later in 2006, the today called faytech AG started to import touch displays in Germany. And within three years, the German corporation became the leading touch device supplier in Germany in this niche.

Based on the early success, Fan Yang joined faytech. After that the management team moved to Shenzhen to start its own production facility in China. By doing this the company now combines German quality and development know-how together with Chinese sourcing and manufacturing competencies. In 2009, faytech Tech. Co., Ltd. was founded and Fan has been leading the company since then as a founding manager.

In 2010, faytech began to produce touch PCs in its own factory for the first time. Today all offered touch devices are solely designed and manufactured by faytech. produced on its own ISO 9001:2015 certified production lines, following strict German quality guidelines and expectations. faytech's marketing strategy is to deliver the best price/quality ratio in the industrial and B2B touch device market.

In 2013, a partnership was created and faytech North America was established in order to better support this market. Recently in 2018 with great demands for products in both India and Japan, offices were established in these two markets. Recently by the end of 2018, due to the great demand of faytech products, the second factory was opened in Suining, China.

## Quality

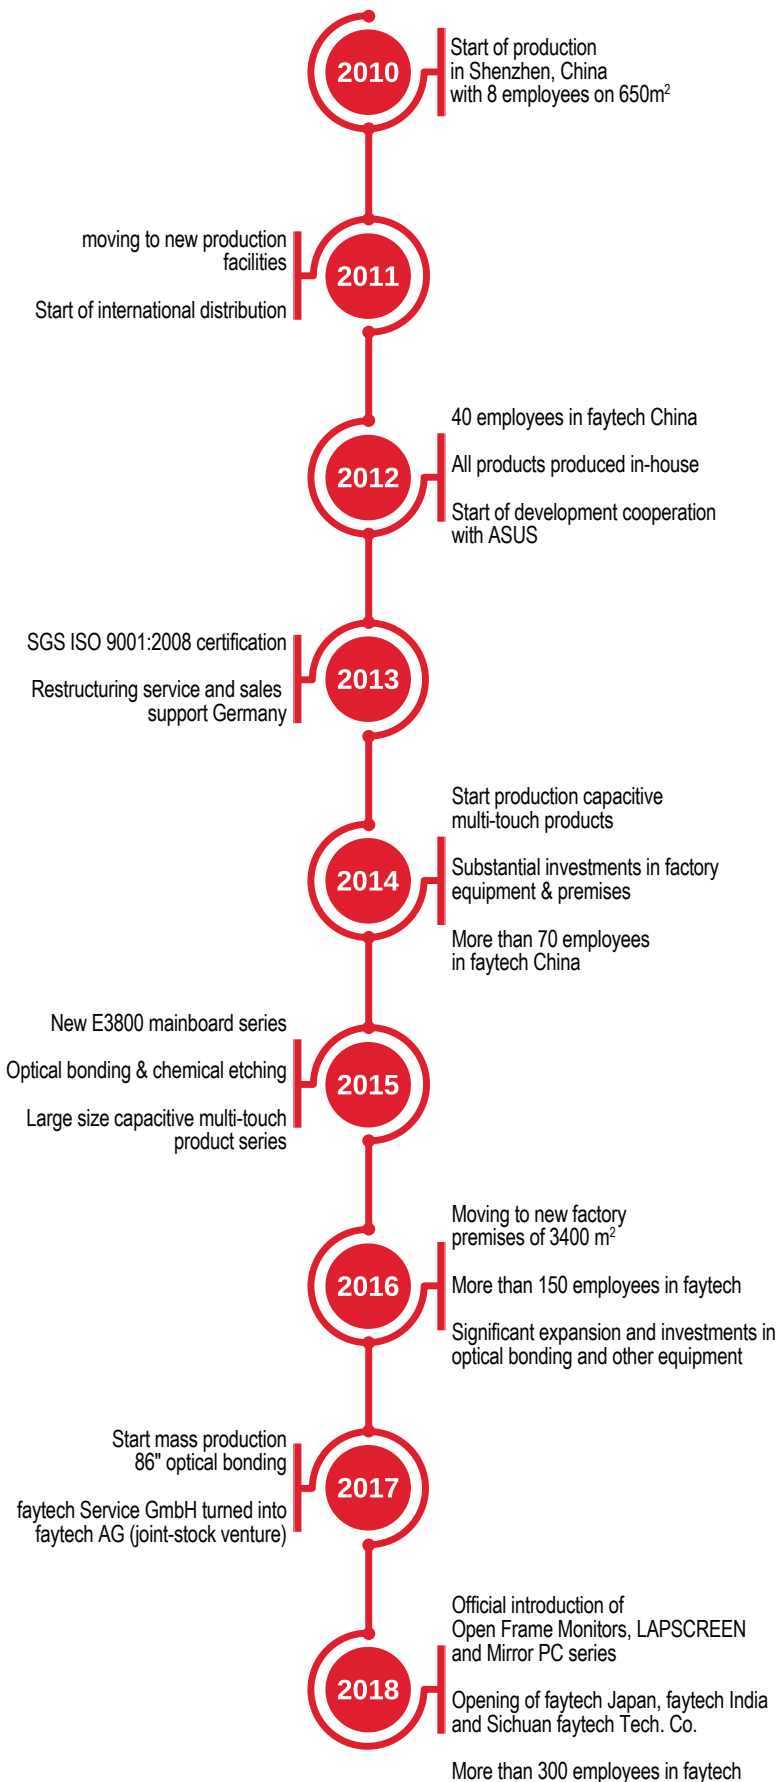

With strong Research & Development teams in both Germany and China, faytech has the ability to develop and innovate new products, which ensures the products provided are always at the technical forefront. In addition to the SGS guided ISO 9001:2015 certification of both our production plants in China, faytech's products have certifications in order to comply with quality control on a global basis.

All of our products receive CE, FCC, CCC and RoHS certifications before being put into our product portfolio. Besides these certification a certain amount of products also comply with special automotive and medical directives, such as the E-Mark and EN 60601-1 Medical certificates.

Before any of faytech's products leave the factory the displays are tested several times and deemed to be completely operational and in perfect condition. With the ERP system currently in use, all productions ever made can be tracked back to its individual supplier and components, this ensures a complete overview of the entire supply chain.

Because of the complete quality control chain from material incoming inspection, production and testing, all the way to after-sales analysis, faytech can make reliable statements regarding their own product quality. With strong ERP systems and data gathering tools, all operations are constantly analyzed and the quality is steadily further improved.

## Standard IT Products

The **Standard IT Product** line focuses on faytech's extremely reliable, well-known and high quality products. The devices in this series are manufactured to meet the highest industrial quality standards and tested thoroughly to make sure it is in perfect condition before the product leaves the factory.

The products in this series all have obtained CE, FCC and RoHS certifications in order to reach a place within this product catalogue. Any other certifications can be obtained by request of the customer, such as for applications in medical and automotive. The monitors, PCs and Kiosks within this product line are used in applications worldwide such as in, but not limited to the following applications:

- **Control Panel for machine control**
- **POS in a supermarket**
- **Stand alone kiosk in an outdoor environment**
- **Digital signage monitor in a shopping mall**
- **Information display in public transportation**
- **Visualization device on robots or forklifts**

Products within this series can also be turned into a project and will be designed together with the customer in order to meet the exact demands. With the expertise of faytech and the control of the entire supply chain, we are able to be completely flexible in delivering customized products for you.

# Capacitive Touch Monitors

faytech's Capacitive Touch Monitors have a modern sleek look with its flat edge to edge glass IP65 water- and dust proof front panels. This product line comes with capacitive 10-finger multitouch (40-finger for 84" device), glass front reaching Mosh 7, the glass surface is anti-glare treated (chemical etched), a wide variety of connectors including USB-B for touch, HDMI, DVI-D, VGA and audio inputs, all lockable including the DC-In. The monitor between 13.3" and 21.5" come with their own desktop stand, and screw patterns on the back for VESA 100 mounts.

These devices are the perfect choice for a wide variety of applications including POS systems, control panels in industrial fields, in kiosk systems, office/residence automation, digital signage and in areas like shopping malls, classrooms, hotels and many more.

# Open Frame Capacitive Touch Monitors

faytech's Open Frame Capacitive Touch Monitors are the perfect choice for industrial and business applications. The capacitive 10-finger multitouch panel brings an easy using experience for a wide range of applications. Each model in this series is built for reliable and extended service with energy efficient LED technology. It is equipped with a wide range of standard connectors, such as HDMI, DVI, VGA, USB-Touch, serial and DC-In.

This device has an optically bonded touch panel, which will improve the stability, reduce the reflection, increase the viewing angle, and enhance the perceived brightness. It also provides resistance to dust particles and shows a better image in general. This open frame version is a light weight model without any back case, which makes it perfect for integrating into your own system or mount at different locations. On top of that, the price will be more economic, because less parts are needed. It is the perfect interactive solution for digital signage, classrooms, meeting rooms, industrial automation, shopping malls, hotels and many other areas.

# Resistive Touch Monitors

faytech's Resistive Touch Monitors make your working process easier and more efficient. These monitors are packed with features and connectors that make them perfect for any industrial or commercial application. Each Touch Monitor is produced using an industrial LCD panel with back lighting (20,000 – 30,000 hour lifespan), 4- or 5-wire resistive touch and anti-glare coating to enhance the user's experience. All these devices are wall mountable or can be stationed anywhere with the high-quality stand.

- The 7 - 10" Monitors have extended current input (8-36V), VGA + HDMI ports, three video inputs, extended temperature range
- The 15 - 19" Monitors have VGA and DVI-D connectors, with additional S-Video and HDMI connections added to the 22" version

This product line is the perfect choice for a wide variety of applications including use in POS systems, as control panels in the industrial area, in kiosk systems, for machine control, in the office and in many other fields.

# IP65 High Brightness Touch Monitors

For industrial and outdoor applications in harsh environments, faytech provides IP65 High Brightness Touch Monitors, which are the perfect solution for such applications.

## Advantages:

- Increased brightness (1000+ cd/m<sup>2</sup>)
- Complete IP65 protection (dust- and waterproof)
- All-in-one cable solution, with VGA or HDMI video connection, USB for Touch and a 8-36V power supply.

The case of the device consists of a robust, sealed aluminum enclosure, with on the front two buttons to adjust the brightness (with 5 available levels). On the back of the device are fixation holes for either VESA 75 or VESA 100 mounting, which ensures solid fixation in any environment.

## Available customizations:

- All-in-one cable, e.g. VGA, HDMI, Video, DVI, S-Video, Audio, Power supply, Voltage, USB or Serial for touch.
- Case color, logo's, housing and fixation
- Rail and/or VESA 75, VESA 100 on the back

## \* Included in the delivery

Power supply (see power section), Short Installation Manual, All-In-One cable (VGA or HDMI), Resistive touch versions also include: Stylus, Remote Controller

A woman with curly hair is shown from the chest up, leaning over a large, flat capacitive touch PC screen. She is wearing a dark top and is touching the screen with her right hand. The screen displays some faint, illegible text. The background is dark and out of focus.

# Capacitive Touch PCs

faytech's Capacitive PC series stands out among competition with its fanless silent operation, IP65 front panel design, high reliability and fine craftwork.

It is the perfect choice for industrial and business application. It has flat edge to edge glass with IP65 water- and dust proof front panels. The heart of the Touchscreen PC is either faytech's industrial fay-002 mainboard or Apollo Lake mainboard. The PC come in the following standard versions:

- Intel® Celeron™ J1900 QuadCore processor, 2.42GHz core speed
- Intel® Celeron™ N3350 DualCore processor, 2.42 GHz core speed
- Intel® Pentium® N4200 QuadCore processor, 2.50 GHz core speed

These PCs are equipped with 4GByte RAM, 64G SSD and Intel's HD Graphic chipset, supporting FullHD, DirectX 11.1 and OpenGL 4.0.

It is the perfect choice for a wide variety of applications including POS systems, control panels in industrial fields, in kiosk systems, office/residence automation, digital signage and in areas like shopping malls, classrooms, hotels and many more.

# Resistive Touch PCs

faytech's Resistive Touch PC series provide incredible stability for business or industrial applications, due to its fanless silent operation, no moving parts design and aluminum housing. Equipped with strong Intel® Celeron™ DualCore or QuadCore CPU, Intel® HD graphics, 2G / 4G RAM and 64G SSD, the system supports various OS, e.g. Win 7/ 8/10 (32 or 64 bit) and Linux. Using 5-wire resistive touch panels (4-wire for 7"), it is our cost-effective yet highly reliable solution for long term operation.

faytech's Touch PCs are the perfect option for moderate and challenging situations, such as industrial automation, POS system, digital signage and many more applications. There is a large range of customization options available, such as complete IP65 protection, upgraded case design, extra added peripherals and more.

# IP65 High Brightness Touch PCs

faytech's IP65 High Brightness Touch PCs are designed for applications in demanding environments, especially outdoor environments with excessive humidity or dust. The special characteristic of this series is the rugged housing, IP65 connectors and high brightness.

The series is equipped with our renowned fay-002 mainboard with Intel® Celeron™ DualCore N2807 or QuadCore J1900 CPU, reliable RAM, SSD and W-LAN modules. The pre-installed Linux Ubuntu or optional Windows OS makes the fanless rugged device work immediately after unpacking.

With its high brightness even in direct sunlight and high-strength safety glass which protects the models from any cracks or scratches, is this the perfect solution for any application in need of a robust, rugged touch device. Customization options are always available on request!

# Embedded Capacitive Touch PCs

There are currently two versions for the V40 mainboard: The standard version with W-LAN and the full version with additional Bluetooth 4.0, GPS, POE Plug-in and OTG port. This is faytech's most cost effective yet powerful Quadcore solution for Android based platforms.

faytech's Embedded Touch PCs are the best solutions for industrial automation, device control and digital signage. A powerful Allwinner® V40 QuadCore CPU, Mali400MP2 graphics chipset, 1G DDR3 RAM and 8GB flash memory. Besides this, it has integrated Wi-Fi and optional 3G & GPS support using the existing SIM card slot. The touch features capacitive 10-finger multitouch panels, Anti-glare chemical etched treatment.

The design of the Embedded Touch PCs follows the application: flat easy to integrate IP65 front and stable rear housing with either VESA 75 or VESA 100 mounting for fixing / integration.

# Kiosks

faytech's Kiosk series are the perfect interactive solution for point of sales (POS), information display or digital signage. Whether you wish to place it next to the brand new car in your store as information display, next to one of your highly promoted cosmetic products or at the entrance of your company building, this is the perfect solution for anyone who requires a slim, easy-to-operate and modern looking kiosk!

## Touch Monitor Kiosks

Available in several large sizes, faytech's touch monitor kiosks feature Full HD industrial 24/7 LCD panels for continuous use with energy-efficient LED backlight technology. The models come with 10-finger multitouch capacitive touch panels, wide viewing angle and stylish appearance.

## Special Kiosks

These kiosks are powered by the powerful embedded V40 Mainboard with QuadCore CPU, Mali400MP2 graphics chipset and various connectors. The Embedded Kiosks are equipped with 1G DDR3 RAM, 8G flash memory and includes a SATA connector as well as SD card slot for further storage expansion.

faytech offers a wide range of customizable features, e.g. an installed industrial PC, credit card payment-terminal holder, printer, flyer holder, RFID scanner, barcode scanner, camera, different colors and more!

# Docking Station

This revolutionary Touch PC series is the perfect solution for any industrial application. With the docking station connector is the back-case PC able to detach from the LCD Panel, which is held in place by strong magnets, and the perfectly fitting 100-pin connection. With the strong fitting metal frame and aluminum case, and edge-to-edge cover glass, is the device neat-looking and modern.

Every model is built for reliability and extended service (at least 30,000 hours). The unit has an industrial HD LCD panel with energy-efficient LED technology, wide viewing angle and multi touch panel, which in combination creates a perfect interactive solution for machine control or any other related application.

# Other

Besides the normal touch PCs and Monitors, faytech also offers specialized products, such as the box PC or Mirror PCs.

## Box PCs

faytech's Industrial PCs are great in combination with any of faytech's touch monitors. Whether it is with the Open Frame, Kiosks or standard touch monitors, these can be used with any of them.

## Mirror PCs

faytech's interactive mirrors are the perfect solution for public or private bathrooms, in hotels, shopping malls, airplanes or any other field that requires a smart mirror! The device is powered by the powerful Embedded V40 mainboard with pre-installed Android system.

Customization options are available for both series, these include but are not limited to LED strips on front, Optical bonded, High brightness, rounded corners, and more!

## Consumer Products

The **Consumer Product line** is something entirely different from the target group and focus of the other product lines. Within this series the focus is on the products which can be used directly by any consumer, thus not only for the business section.

All products within this series have obtained CE, FCC and RoHS certifications, and have passed any requirements in order to be sold to the consumer market. The products within this series are reliable, easy-to-use and perfect to be used by any consumer.

The products can be easily purchased from one of faytech's distributors or from faytech directly. Currently, the series is limited to the LAPSCREEN, which can be used for any different kind of application for either businesses or private use.

# LAPSCREEN

This lightweight portable monitor, also known as the LAPSCREEN, is the perfect solution for people that require an extra screen while doing their day-to-day activities. Whether you connect it to your mobile phone, tablet or laptop, it will be an easy and convenient way of extending (or duplicating) the screen of your smart device over USB Type-C or HDMI cable.

With a weight of only 350-400 gram and roughly similar measurements as an A4 paper / US letter, would this monitor work perfect for people on-the-go. There is currently a 10-point multi-touch version available, as well as a non-touch version, your solution for your needs! Whether you are on a business trip, with the need to give presentations in different locations, a student constantly working on different projects or just a casual traveller that needs an extra screen, the LAPSCREEN is the solution for you.

The monitor has a full HD LCD Panel with a thickness of less than 4mm and no bezel on the sides and top, it is invented by Michél Haese and exclusively produced by faytech. The LAPSCREEN is also referred to as the 3rd evolution of mobile computing right after the LAPTOP and SMARTPHONE, due to its innovative design and many application uses.

| Product Name | 12.5" LAPSCREEN Monitor (no touch) | 12.5" LAPSCREEN Touch Monitor |

USB Type-C Cable

## Expertise

In order to provide the best quality for our customers, we make sure that all in-house processes are done within a clean and highly specialized environment, in order to provide the best quality to our customers.

Besides this, all components received from our suppliers has to meet certain inspection criteria before being used in any of the faytech devices. This includes, but is not limited to the glass panels, LCD panels and casing.

The **Expertise** of faytech is to provide the best display quality, including the optical bonding possibility. This in combination with the customization options provided to our customers makes our packages one of the most competitive within this industry.

## Optical Bonding Expertise

One very important part of faytech's unique selling point is the in-door optical bonding. Optical bonding is the process of filling up the airgap between the cover glass and LCD cell to increase the quality of the device. faytech uses silicone-based adhesive with the best properties available to date for this process. There are many advantages of touch devices which are optically bonded with silicone glue compared to the non-optical bonded versions.

## Advantages of Optical Bonding

- **Reduce the reflection**

Every time light enters a material with a different refraction index, about 4% of the light will get reflected, with the silicone glue in between, this refraction does not occur at this position. In general, optical bonding can potentially reduce reflections by about 65%.

- **Increase the overall brightness**

Light which comes from the backlight must go through the cover glass, this causes internal reflections of the light. With the optically bonded units, this reflection does not occur, thus increasing the brightness of the display by 10%.

- **No fogging or dust within the display**

If a device is not optically bonded, there is always a small air gap between the cover glass, touch panel and LCD panel. Within this gap condensation could occur due to deviations in temperature or air pressure, especially when the system is sealed and unable to circulate air. The same problem could occur with dust in the system for devices that do not require an airtight sealing. With optical bonding, this would not be possible, because the air gap is filled with the silicone glue.

- **Ruggedizing of the display**

Filling the air gap with silicone gives additional strength to environmental forces which otherwise could break the glass. At the same time the silicones elasticity is still able to absorb the shocks.

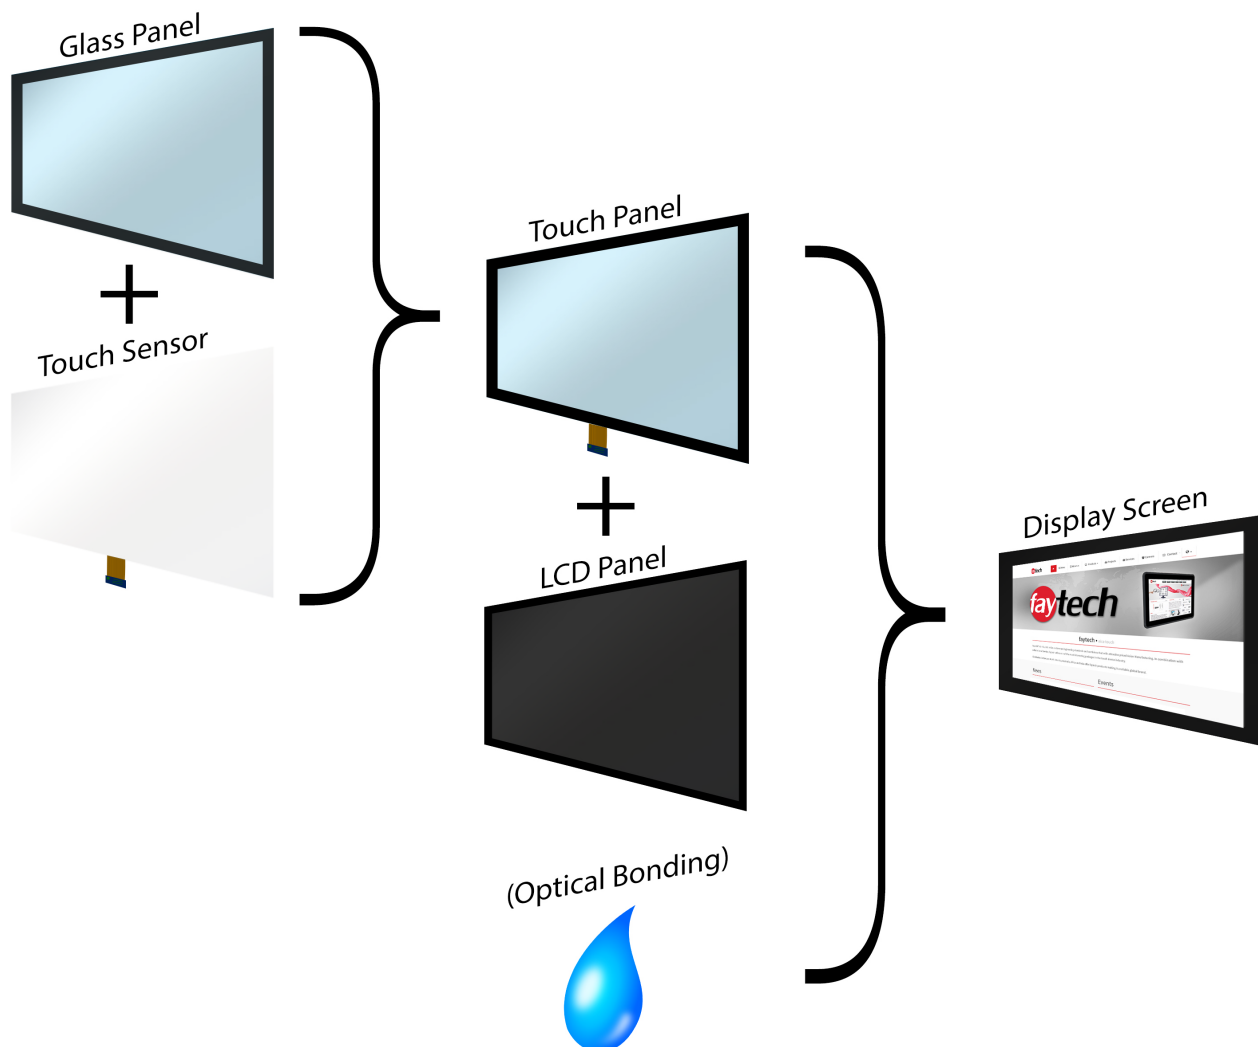

## faytech's Display Quality

In order for faytech to provide the best quality products to the customers, we make sure the entire supply chain is controlled. Each single component is precisely selected and thoroughly inspected in order to meet the highest quality standards in the market. This way faytech is able to only produce the best quality devices for the customers.

The quality of the screen is very important part of faytech's devices, thus also requires to meet certain criteria. On the following pages are texts and tables which explain the amount and size of cosmetic defects allowed in the components before it is being used for faytech's manufacturing process. These components include:

- Glass Panel
- Touch Panel
- LCD Panel

In order to fully understand the components used for the display screens of faytech devices, the process is visualized in the diagram below:

## Glass Panel Inspection Criteria

The quality of the glass panels received from faytech's suppliers is inspected for several criteria, before being used. By thoroughly inspecting the glass quality, faytech ensures that the panels used for the production of the devices meet the highest standards possible. Below and on the next page is the inspection criteria for the glass panel summarized in two tables.

## Glass Panel Inspection Criteria (7" - 32")

|                                |  | 7" – 12.5"   | 13.3" – 32"   |
|--------------------------------|--|--|---|
| Circular                       | Acceptable defects                                   | D < 0.15mm<br>0.15mm ≤ D ≤ 0.30mm<br>N ≤ 2               | D < 0.15mm<br>0.15mm ≤ D ≤ 0.60mm<br>N ≤ 2              |
|                                | Unacceptable defects                                 | D > 0.30mm   | D > 0.60mm  |
|                                |  | Bubbles, blotches or salient dots                        |   |
| Line                           | Acceptable defects                                   | W < 0.025mm<br>0.025mm < W ≤ 0.08mm<br>N ≤ 2, L ≤ 2.0mm  | W < 0.025mm<br>0.025mm < W ≤ 0.08mm<br>N ≤ 2, L ≤ 5.0mm |
|                                | Unacceptable defects                                 | W > 0.08mm   | W > 0.08mm  |
|                                |  | Scratches detectable with the finger                     |   |

Should any of the standards for the inspection criteria not be met, then the glass panel will not pass the quality inspection and thus will not be used for any of faytech's devices. However, if it passes, the touch sensor is applied to the glass panel and in combination will become the touch panel.

## Touch Panel Inspection Criteria

The touch sensor will be inspected thoroughly once it is combined with the glass panel. This is to make sure both the attachment process and the sensor itself is of the highest quality. Below and on the next page is the inspection criteria for the touch panel summarized in two tables.

## Touch Panel Inspection Criteria (7" - 32")

|                        |  | 7" – 15"   | 15.6" – 32"   |   |
|------------------------|--|--|---|---|

| Adhesive / glue        | Unacceptable defects                           | Leakage of insulating glue in not allowed  |   |   |
|                        |  | Sealing adhesive being higher than FOG glass is not allowed  |   |   |
| Dimensions             | According to drawing of the individual product |  |   |   |

N = Number of defects  
 D = Diameter of circular defect  
 L = Length of line defect  
 W = Width of line defect  
 X = Length of breakage  
 Y = Width of breakage  
 Z = Thickness of breakage  
 WA = Warpage of glass

## Touch Panel Inspection Criteria (42" - 86")

|                        |  | 42" – 55"  | 65" – 86"  |
|------------------------|--|--|--|
| Circular               | Acceptable defects                             | D ≤ 0.60mm<br>D ≤ 1.00mm<br>N ≤ 10   | D ≤ 1.30mm<br>1.30mm ≤ C ≤ 1.50mm<br>N ≤ 12                        |
|                        | Unacceptable defects                           | D > 1.00mm   | D > 1.50mm   |
|                        |  | 2 defects within a 50mm diameter area                                      |  |
|                        |  | Point-like defects found within 5 seconds of observation                   |  |
| Line                   | Acceptable defects                             | W ≤ 0.05mm, L ≤ 2mm<br>0.05mm < W ≤ 0.15mm,<br>2 ≤ L ≤ 10mm, N ≤ 4         | W ≤ 0.05mm, L ≤ 2mm<br>0.05mm < W ≤ 0.15mm,<br>2 ≤ L ≤ 10mm, N ≤ 8 |
|                        | Unacceptable defects                           | W > 0.15mm   | W > 0.15mm   |
|                        |  | Point-like defects found within 5 seconds of observation                   |  |
|                        |  |  |  |
| Edge / corner breakage | Acceptable defects                             | Reverse side: X < 1.5mm, Y ≤ 1.5mm, Z < ½ t                                |  |
|                        | Unacceptable defects                           | If breakage affects silver printing  |  |
| Cracks                 | Unacceptable defects                           | No cracks are allowed  |  |
| Surface dirt / prints  | Unacceptable defects                           | Fingerprints & surface dirt is not allowed                                 |  |
| Warpage                | Acceptable defects                             | WA ≤ 0.30mm (for 2.80mm cover glass)<br>WA ≤ 0.50mm (≤ 2.00mm cover glass) |  |
|                        | Unacceptable defects                           | WA > 0.30mm (2.80mm cover glass)<br>WA > 0.50mm (≤ 2.00mm cover glass)     |  |
| FPC defects            | Unacceptable defects                           | Sharp creases, burrs, wavy edges and oxidation is not allowed              |  |
| Etched grain           | Unacceptable defects                           | Etched grain visibility under natural light is not allowed                 |  |
| Adhesive / glue        | Unacceptable defects                           | Leakage of insulating glue in not allowed                                  |  |
|                        |  | Sealing adhesive being higher than FOG glass is not allowed                |  |
| Dimensions             | According to drawing of the individual product |  |  |

N = Number of defects

D = Diameter of circular defect

L = Length of line defect

W = Width of line defect

X = Length of breakage

Y = Width of breakage

Z = Thickness of breakage

WA = Warpage of glass

## LCD Panel Inspection Criteria

The LCD panels purchased from faytech's suppliers are also inspected thoroughly, and no other than A+ quality is allowed. faytech ensures that the LCD panels used within the devices are of the best quality in the market.

Each LCD panel size being used by faytech has their own inspection criteria regarding the pixel defects. For sizes up to 10.1" faytech guarantees no pixel defects, while the larger sized each have their own criteria to pass the inspections. Specific LCD panel criteria can be acquired by requesting it for the specific size you wish to use for the project.

## Optically Bonded / Non-Optically Bonded

After the touch panel and LCD panel passed all the tests and criteria, it moves on to the next stage to be combined together into the display screen. This process can be either done with or without the silicone glue, thus resulting in either an optically bonded device or a non-optically bonded device.

faytech's own silicone glue formula is used to optically bond the selected device. This glue is specifically designed for this purpose in order to meet the highest industry standards in the market.

(Optical Bonding)

## Display Screen

After this process of combining the touch panel with the LCD panel a final quality control check is performed to make sure the final result is an A+ quality panel.

Once this is done, the display screen can be assembled into our renowned faytech devices according to standard specifications or customized projects to meet the customer's requirement.

*Inspection of an 86" optically bonded display screen*

## Customization Options

faytech is able to custom design and produce any touch device for your project. All the standard products currently provided by faytech can be customized on request to fit your specific requirements. Whether you need a resistive or capacitive touch device, we are able to modify the device to your needs. faytech is able to utilize the strong manufacturing capabilities, experienced engineers and extensive portfolio of completed projects in order to provide the best results for your specific project.

Customization options are possible, these include but are not limited to customizing the case design, case color, connectors, cables, buttons, brightness, touch panel and mainboard. Peripherals can also be added to the device and can be integrated within the case if requested, some examples are GPS, smart card readers, cameras, RFID readers, payment systems, printers and many more.

Besides this, all of faytech's standard PCs can be upgraded to fit a more powerful mainboard inside. The mainboards available at faytech are the following:

- Allwinner® V40 Cortex™ A7 QuadCore
- Intel® Celeron® Dualcore N3350, with 2x 2.40 GHz
- Intel® Pentium® Quadcore N4200, with 4x 2.50 GHz
- Intel® Core™ i3-7100U Processor, with 2x 2.40 GHz, 3M
- Intel® Core™ i5-7300U Processor, with 2x 2.60 GHz, 3M
- Intel® Core™ i7-7600U Processor, with 2x 2.80 GHz, 4M

### Customization examples

#### 7" IP65 Touch Monitor with RFID

- Customized IP65 case
- E24 certified for motor vehicles
- All-In-One IP65 cable
- 5 customized buttons on the front
- RFID reader
- Integrated Camera
- Extended voltage input 8~36V

#### IBox Touch

- Customized white aluminum Case
- Medical certified (EN 60601-1)
- Customized video connectors
- Customer's branding applied
- Intermediate storage
