JEA Technologies Pty Ltd was established in 2003 and we are a specialist distributor of electronic peripherals covering Australia and New Zealand. We focus on industrial, professional and commercial applications. JEA has partnered with leading global manufacturers to bring their products to Australia and New Zealand, and we provide in depth technical, commercial and logistics support to our customers on these products. Our people are product specialists who have many years' experience working with the products, suppliers and customers. This experience has often made the difference between a successful product deployment or a costly failure by our customers. We work closely with our customers to fully understand their needs from both technical and commercial perspectives, we then recommend optimum solutions to meet our customer's needs. We back up this consultative process with in-depth stock, logistics services, and in house repair services that can provide both warranty and non-warranty repairs and spare parts. JEA specialises in touch screens, touch monitors, touch foils, safety products, commercial and industrial LCDs, high brightness/sunlight readable displays, cash and cashless payment products, computer products and thermal printers for kiosks, ticket printers, industrial printers, industrial networking, industrial cellular routers and modems, IP65+ hardware, card readers and writers, industrial airconditioning, powered air respirators, vibration safety equipment, high voltage safety products, ear defenders, safety helmets and personal safety lights.
